DETAILED Inspiration User Guide for Librarians

Use the **filter tree**, for example in the **article search**, which includes options such as:

- Type of contribution
- Building type/function
- Load bearing structure
- ...

Additionally, you can apply **extended filters** to narrow down your results:

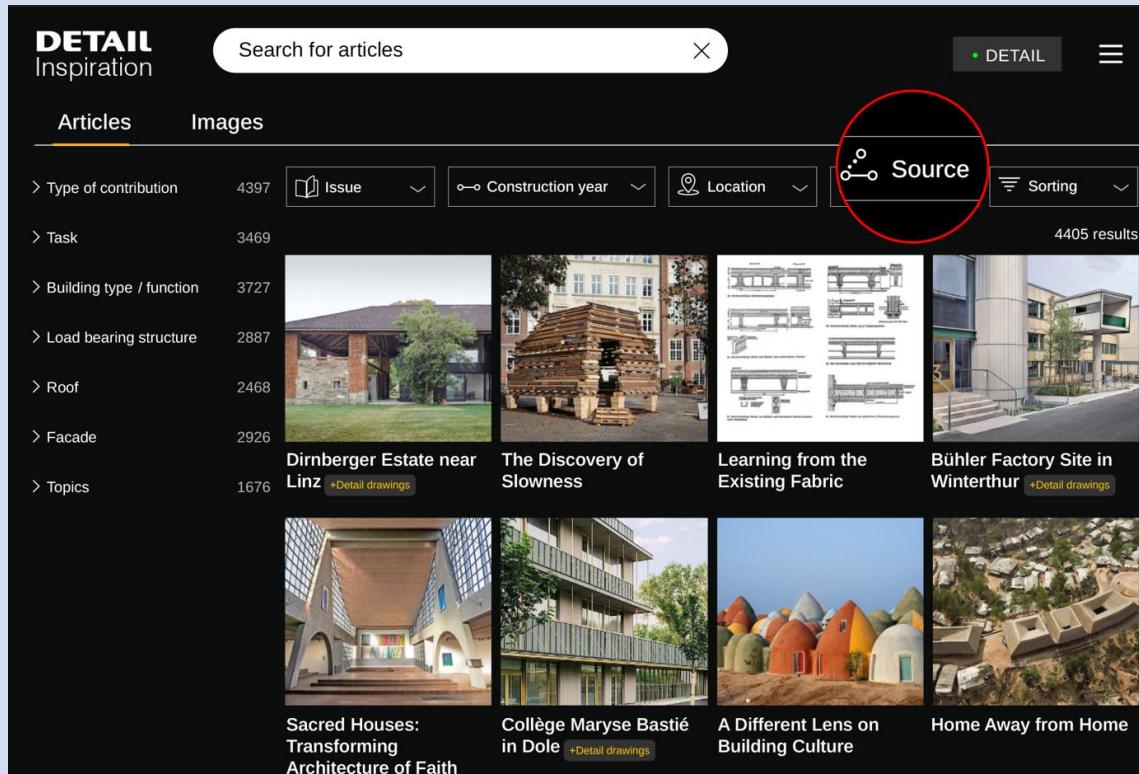

- Issue
- Construction year
- Location
- Source
- Sort by the newest first.

These tools will help you find projects that are most relevant to your research.

Multifamily House in Leiria

Issue 05/2025 Facades	Source DETAIL	Task New construction, Conversion
Location Portugal, Leiria	Year of construction 2024	Architecture Bureau des Mésarchitectures

Alternating large-format openings and closed precast concrete elements define the exterior appearance of the house in the small Portuguese town of Leiria. Prominently located at a traffic intersection on the rim of the historic centre, the building presents its curved main facade to the surrounding streetscape.

The multifamily structure consists of two parts: a two-storey volume erected in the early 20th century and a four-storey addition with a fan-shaped floor plan connected to the corner of the old edifice. The latter is a typical example of local architecture. Its envelope – a facade with yellow render and arched window openings, covered by a red tile roof – was maintained and carefully renovated.
