

# IE Repository

IE repository is an open access platform that collects, manages, and preserves the academic, research and institutional output of our university and our community (researchers, professors and staff). This Repository aims to enhance the visibility and impact of our research community while fulfilling open access mandates from funding agencies and institutional policies.

## Key Benefits

### Visibility Increase

Expands the reach and impact of academic work through open access.

### Compliance with Regulations

Ensures adherence to legal and funding requirements in Open Science.

### Accreditation Support

Provides a reliable record of research contributions for evaluations.

### Long-Term Preservation

Safeguards research outputs for future access and reuse

## What can I upload?

The repository accepts a variety of academic, educational and institutional documents, ensuring open access to valuable research and teaching materials.

Article

Book Chapter

Report

Working Paper

Doctoral Theses

Conference Contributions

Open Educational Resources

Before uploading, it is advisable to check the repository's specific guidelines to ensure compliance with its submission policies.

## Document Version

### Published version

Final, official version of a manuscript as it appears in the journal or publisher's platform

### Accepted version

Final version of a manuscript after peer review, but before the publisher's formatting, layout, or branding

### Pre-print

Version of a research paper shared publicly before formal peer review
