

Guide: Finance

How to get financial data from companies?

Access the [Orbis](#) database to obtain financial data for international companies. Use [Sabi](#) if the companies are in Spain or Portugal. Once logged in, enter the name of the company in the search box. Then click on the name of the company that appears in the resulting list to get a standard report on that company.

Financial and risk solutions provided by [Workspace \(formerly Eikon\)](#) provide information and analysis to the entire financial community also allowing for transactions, connecting investment and trade communities with financial and corporate professionals.

[Bloomberg](#) provides financial information services, surveying and analyzing the financial information of the markets in real-time, examining transactions of asset purchases and sales in the system.

How to retrieve financial data from countries such as exchange rates, monetary data, international liquidity, interest rates, prices, production, labor market, international transactions, public accounts, and population?

Access current ongoing forecasts of selected countries, exchange rates of their currency vs. the US dollar and euro, share prices, estimated interest rate, etc. from the perspective of the [ABI/INFORM Global](#) source, specifically through its [Economist Intelligence Unit \(EIU\) ViewsWire](#) section.

The financial data from the [IMF \(International Monetary Fund\)](#) can be viewed in the [IFS \(International Financial Statistics\)](#) database, which is owned by Institution.

Accessing [I/B/E/S](#) provides detailed and consensus estimates, offering up to 26 forecast measures, including GAAP and EPS pro forma, income/sales, net profit, pre-tax profit objectives, and operating profit; prices and recommendations. Use [I/B/E/S Academic](#) to explore consensus forecasts in detail from security analysts, including earnings per share, income, cash flow, long-term growth projections, and stock market recommendations.

Can public financial data be accessed, such as income, expenses, and taxes on income, profits, capital gains, wages, property, goods, and services, etc.?

Absolutely. Use the [GFS \(Government Finance Statistics\)](#) owned by the International Monetary Fund (IMF).

[Wharton](#), in the Public Data database providing information on GDP, personal consumption expenses, gross domestic private investment, net exports of goods and services, government consumption expenditures and gross investment, gross domestic product, and personal consumption expenses.

[Bloomberg](#) provides financial information services by surveying and analyzing markets' financial information in real-time, examining transactions of asset purchases and sales in the system.

How to find information about investments, securities, and more specifically on options and futures or about portfolio and product management?

[Bloomberg](#) can be used to manage currency risk with the following options: risk quantification, evaluate risk coverage strategies, comparing prices between the one offered by a broker and those offered by markets, improving transactions and managing the issue of obligations and risks interest rate risks; management of the supply and supply chain; etc.

Using [ABI/INFORM Global](#), the [Topic Paths](#) option provides information on investments and securities. It also offers documentation on the following sections: funds, options and futures, markets and trades, performance measures, portfolio management, and products.

[CRSP SBF US Mutual Funds Database](#) shows information about investment funds: summaries, daily returns, monthly returns, portfolio holdings, dividend fund, fund portfolio map, front and back charges.

How to acquire information on corporate finance?

The specific information can be obtained under the social capital section in the [ABI/INFORM Global](#), and specifically in the [Topic Paths](#) option, with a focus on capital management (assets, structure, equity, leverage, current and current liabilities, etc.); corporate debt (cancellation, financing, debt management, and restructuring, mezzanine financing, liquidation, bankruptcy, etc.).

[Bloomberg](#) runs a detailed quantitative analysis that can be used to manage exchange-rate risk with the following options: quantifying risk, evaluating risk coverage strategies, comparing prices between those offered by a broker and those offered by markets, improving transactions and workflow; managing cash, detecting adequate investments, controlling and analyzing portfolios and transactions; managing obligations issuing and interest rate risk; supply and supply chain management; etc.

Looking for information on suitable debt-to-equity ratio, benefit-cost ratio, cash flow, solvency ratio, market value, return on investment (ROI), and return on equity (ROE)?

Log into the [ABI/INFORM Global](#) and select [Topic Paths](#) to access this type of information under the financial behavior tab, and, more specifically, in the financial analysis and profit and loss sections.

[Wharton](#) in the Public Data database provides information on GDP, personal consumption expenses, gross domestic private investment, net exports of goods and services, government consumption expenditures and gross investment, gross domestic product, personal consumption expenditures, etc.

The [ICAC \(Instituto de Contabilidad y Auditoría de Cuentas\)](#) has authority regarding accounting planning and standardization nationwide, in addition to audit control. It also provides access to national and international regulations and account auditing.

Is there any information on credit management?

There is! Below are some of the topics in this section for which specific documentation can be found: seized assets, bankruptcy reorganization, billing, credit policies, and reports, among others. All this information can be checked in the [ABI/INFORM Global](#), under the [Topic Paths](#) option.

In addition, the [Bloomberg](#) evaluation tool utilizes a quantitative analysis to assess the creditworthiness of commercial counterparties by using a single credit analysis model that calculates the credit adjustment on individual transactions to develop a clear credit strategy.

How to find information on risk management?

Access the [ABI/INFORM Global](#) and select the [Topic Paths](#) option to obtain the available documents on risk evaluation, aversion, exposure, management and risk sharing and, business and credit insurance.

Use the [Bloomberg](#) resource to evaluate the creditworthiness of commercial counterparties. Use a single credit analysis model that calculates the credit adjustment in single transactions.

The financial and risk solutions provided by [Workspace](#) offers both information and analysis to the global financial community and can also be used for transactions and interconnection of investment and trade communities with financial and corporate professionals.

How to look for information about the Chinese funds market?

With [Country Reports](#), find statistics and country information, by region and publisher as well as country risks and forecast for Chinese business.

Other available resources worth using to find detailed information are [SWOT Analyses](#) and [Economist Intelligence Unit \(EIU\)](#).

[IAS Plus](#) can be used to read global news on accounting, sustainability reports, agenda, and summaries, prior to the meeting of the Interpretations Committee of the IFRS – accounting standardization between countries and the Shari'a Standards.

How can data be obtained on global markets?

With [Ft.com – Markets](#), access data extracted from the Rating Agencies (Standard & Poor's (S&P), Moody's, and Fitch Group, etc.), in addition to data on stocks, currencies, commodities, commodities, and bond interest rates.

The databases in [Wharton CRSP](#) provide historical data on securities, primary listings on the NYSE, including Nasdaq and AMEX; stock market research, economic forecasting, stocks, indices, treasury, investment funds, and real estate; security prices. In addition, CRSP contains securities, yield, and volume security prices for the NYSE Stock Exchange and Nasdaq and AMEX listed companies.

Another portal to obtain data and market information is [Workspace](#).
